PROJECTS

QR code based Smart Parking System | *Python, HTML, CSS, JavaScript, Django, SQL*

- Developed a comprehensive Smart Parking Management System to streamline parking operations for administrators and users, focusing on features like real-time parking slot management, user registration, feedback analysis, and payment handling.
- Integrated automated calculations for parking charges, real-time availability updates, and seamless payment processing.

Fraudulent Credit Card Activity Detection Using Adaptive Boosting And Aggregate Voting | *Java, HTML, CSS*

- Developed a web-based application to detect and manage fraudulent credit card activities by integrating machine learning models.
- The system includes multi-role access for bank admins, e-commerce platforms, and users and data operations.
- Implemented automated credit card number generation and authorization workflows for multiple banks, enhancing data security and user authentication.

INTERNSHIPS

Full-Stack Web Development – Yhills | *HTML, CSS, JavaScript*

3 Months

- Developed a responsive landing page using HTML, CSS, and JavaScript featuring a dynamic navbar, interactive FAQ section, mobile-friendly navigation menu.
- Enhanced user experience through modern design and interactive elements.
- This project highlights my expertise in front-end development, including responsive design, DOM manipulation, event handling, and third-party library integration.

Full-Stack Web Development in MERN-Web Stack Academy | *HTML, CSS, JavaScript, React*

3 Months

- Developed a food delivery application with essential functionalities like user authentication, cart management, order placement, and payment.
- Designed and implemented a scalable RESTful API using Node.js and Express, integrating multiple features such as restaurant management, menu handling, payment processing, and user authentication.
- This project highlights my expertise in front-end development, including responsive design, DOM manipulation, event handling, and third-party library integration.

TECHNICAL SKILLS

Languages : Python, SQL, JavaScript, HTML/CSS

Frameworks : Django

AI

SKILLS

Good communication skills

ACHIEVEMENTS

- Awarded a certificate for participating in a poster presentation on Artificial Intelligence(AI).
- Received a certificate of appreciation at Technoit Event.
